

## Waste Auditing

Do you know what happens to your waste – and is it correctly managed in compliance with waste management legislation?

The cost of non-compliance in your organisation or by those who handle your wastes can affect the business performance, profitability and reputation.

### Aims of the course

Building on an understanding of waste legislation including duty of care; hazardous waste regulation and applying the waste hierarchy this waste auditing course aims to provide practical advice on undertaking both an internal waste compliance audit and a duty of care audit on your suppliers of waste management activities.

This course will help you identify areas that are compliant along with those that may require improvement as well as determine and record good practice in waste management in your business.

### Learning objectives

By the end of this course you will be able to:

- Understand the role of auditing of external waste facilities in helping to comply with your duty of care obligations
- Understand the range of criteria to evaluate as part of a duty of care audit
- Determining the suitability for using the waste management operator
- Review and develop current external auditing forms
- Measure your organisations waste
- Know how to plan and deliver an audit of your waste arising's – including visual inspection and paperwork compliance
- Know how to evaluate data from an internal waste audit and identify key findings
- Identify areas for improvement relating to non-compliance

### Who should attend?

This course is designed both for waste producers and waste managers - anyone who needs to know how to identify waste arising's and resulting improvements in their own organisations waste and resource management and needs to understand how waste is being managed once it leaves the site. All delegates should have a basic understanding of duty of care and the general requirements for managing hazardous waste.
